

Declaration of architectural accessibility of the office building and Beyond.pl Data Center 2

Entrance to the site:

- there is a main entrance to the site located from Adam Kręglewski Street;
- there is an intercom at the main gate at a height of 135 cm, no threshold, gate wider than 90 cm;
- entry to the car park of the office building is possible through the main gate and the barrier with an intercom unit located at the height of the driver's window;
- Access through the main gate for wheelchair users requires assistance from a third party due to the weight of the gate and the self-closing device. In the event of any problems, a security guard is available (tel.: 505 820 069);
- before entering the office building, security checks are carried out by procedures: <https://www.beyond.pl/go-bdc2/>;
- if you have a pacemaker or use an ECG Holter recording device, you must inform the Security Officer and present the device's ID card or medical certificate;
- wheelchair users are subject to security checks using a hand-held metal detector;
- three accessible parking spaces are available.

Office building:

- inside the building, there are no spaces with a width of less than 90 cm and handholds and handles over 110 cm;
- a toilet for the disabled is located on the ground floor to the left of the main entrance (the toilet has a paging system that communicates with the building's security);
- the office building is equipped with a lift;
- the staircases are equipped with handrails;
- there are no induction loops, Braille signage or contrast or enlarged print signage for the blind and partially sighted in the building.

Data Center 2:

- the part of the Data Center 2 tour located in the office building has a staircase (without a lift). Access to the tour within the server room building for a person with a mobility disability (in a wheelchair) is via the logistics building, assisted by a Beyond.pl representative.
